

NEW STS-4 Squaring With Style

Tri Tool's New Easy-To-Use Tube Squarer Is Stronger & Sleeker Than Ever

Stop fussing over receptacles or generators in the shop when squaring and facing tube. Tri Tool's **new STS-4** cordless benchtop tube squaring machine features a sleek black finish and an upgraded metal chip guard that resists scratching, improving visibility and durability. Key features include quick-change, tool-free saddles, graduated feed, and a high-visibility design that includes our new Lumen light, which provides illumination to easily see scribe lines on a workpiece. The **new STS-4** comes with a dual-range variable-speed brushless drive, perfect for cleanroom applications. The cutting head supports squaring, beveling, facing, and ID deburring bits, making it a trusted solution across industries for larger tube cutting and squaring tasks. The **new STS-4** is also available as a corded version.

NEW!
LED Light Feature

Consistent
Get square, burr-free cuts or
perfect bevels every time

Versatile
Quickly, accurately bevels pipe of
various sizes and materials

New STS-4 Beveler

- Squares, faces and bevels for prepping pipe and tube
- 0.250" - 4.500" [6.35mm - 114.3mm) range
- OD Mount Machine
- Quick-change stainless saddle clamping (no special tools required)
- Improved, scratch-proof metal chip guard
- New Lumen light illuminates scribe lines on workpiece and assists in tooling changes
- New modern black finish
- Precision graduated feed
- Variable speed, dual range drive motor for optimal cutting speed
- Cordless motor option available for easy maneuvering on a shop floor or in the field
- Cordless motor battery works with other Tri Tool cordless tools.*

NEW Lumen light

Level up your tube squaring and facing with the **new STS-4**

©2025 Specifications are subject to change.

The STS-4 System Comes Complete With:

- Wrench Kit
- Carrying Case
- Operator's Manual

Dimensions:

Weight:

- 16.9 lbs. (7.7 Kg)

Cut Capacity:

- 1/8" through 4" pipe
- .250" (6.35mm) to 4.50" (114.30mm) tube
- Wall Thickness up to .250" (6.35mm)

Material Capabilities:

- Mild, chrome and stainless steels, copper-nickel alloys and aluminum
- Inconel and some other high-temp alloys with some limitations/special procedures

Drive System

- Variable Speed Electric Drive Motor (Cordless)
- Cutting Head Speeds:
- Dual Range, Variable Speed Electric Drive
- Range: 15-200 RPM (Cordless)
- 0-107 RPM (Cordless)

Feed:

- .560" (14.2mm) of axial feed
- Manual Feed Handle mounted at rear of tool

Mounting:

- Manual Saddle Clamping System

Charger/Motor:

- 115V, 230V (Type C or G), 100V (Japan)

Available Accessories:

- Electric Foot Pedal
- Short Perch Saddle Sets
- Tool Bits
- Collet Adapter Kit (for use with 400 Series Collets)

Level up your tube squaring and facing with the new STS-4
